First Ricoz pvt.ltd Kolkata

- Continuously improve my coding skills and knowledge of programming languages, Frameworks, and tools.
- Analyze and troubleshoot technical issues, Identify root causes, and Propose solutions to resolve them.
- Manage time effectively to meet deadlines and priorities tasks according to project requirements and team priorities.

PROJECTS

To-Do List App. Users will learn to manage tasks and time effectively through the creation, organization, and prioritization features of a to-do list application. They will develop proactive planning habits, enhance productivity, and foster accountability by tracking and achieving personal or professional goals.

Invoice Maker Apps. Users will acquire the ability to efficiently create, customize, and manage invoices through an invoice maker app. They will gain skills in tracking payments, handling client information, and generating financial reports, thereby improving their financial organization and business processes.

Multiuser web-based chatting app. Users will learn to communicate effectively using a multiuser web-based chatting app built with HTML, CSS, JavaScript, and WebSockets. They will master real-time messaging, group chat management, and user interactions. Additionally, they will develop skills in coordinating conversations, ensuring chat security, and using multimedia sharing to improve online collaboration.
